## GENERAL TERMS AND CONDITIONS OF SALE

### 1. TERMS AND CONDITIONS OF SALE

This price list and these general terms and conditions of sale replace all previous versions and apply to the sales relationship between Scab Giardino S.p.A. (hereinafter, "S•CAB") and the Purchaser (hereinafter, the "Purchaser"); and are understood as being fully accepted in the event that an order, even verbally, is placed or the goods are received.

### 2. CATALOGUES

The technical data and the photographs contained in this document are indicative. S•CAB reserves the right to remove or to modify, at any time, the items, patterns, packaging, lines and characteristics of the products, without notice, including within the period in which the catalogue and the price list are valid.

### 3. ORDERS

A sale will only be considered concluded when the order is accepted, in writing, by S•CAB or following the shipment of the goods. Any orders placed verbally, including by telephone, shall only be effective if confirmed, in writing, by S•CAB or in the event that the goods are shipped. S•CAB may, at its sole discretion, refuse an order placed by the Purchaser. In the event that an order is accepted by S•CAB with a request for the sales price, in whole or in part, to be paid in advance, the contract will only be considered concluded following the effective payment requested; the delivery terms shall run from the date of the same payment. In the case of orders with products covered by fabric supplied by the Purchaser, the delivery terms shall run from the date on which the fabric is actually received by S•CAB. S•CAB, in the course of confirming the order, may ask for prices to be increased and may amend the terms and conditions of sale and of payment in the following cases:

- special products have been requested which are not found in the catalogue;
- a special packaging request has been made;
- a packaging request has been made for non-standard quantities.

These requests must be sent by the Purchaser in writing and must be expressly accepted by S•CAB.

Changes to orders, to be understood as changes decreasing or increasing the items or changing items, must always be accepted, in writing, by S•CAB. The delivery terms shall be reset and shall run from the date on which the change to the order is accepted.

### 4. PACKAGING

S•CAB products are packaged as per the type indicated in the price list. Any request for packaging other than that provided for in the price list must be made in the order, in writing, and must be expressly accepted by S•CAB. In the case of an order for products in quantities lower than the number of pieces provided in the minimum packaging quantity in the price list, the order shall be understood as being automatically made for the greater minimum number of pieces indicated in the price list. In exceptional cases and only following authorisation by S•CAB to proceed with packaging for a number of pieces other than that given in the price list, the Customer will be charged €10.00 net for each set of packaging. For goods packaged on pallets not provided for in the list price which are requested by the Purchaser and only if authorised by S•CAB, a charge shall be made of not less than €40.00 net for each europallet and not less than €25.00 net for each disposable pallet, regardless of whether S•CAB indicates the cost increase in the order confirmation, in addition to any other charges for labour costs.

### 5. PRICES

The prices in the S•CAB price lists and catalogues are reserved to Dealers and shall be understood as being recommended retail prices and do not include VAT, other taxes, duties, expenses for transport, shipping, packaging and insurance during transportation. S•CAB reserves the right to modify prices, at any time. The offers prepared by S•CAB are valid for one month, unless a shorter validity period is specified in the offer and, if not accepted, will automatically lose their validity, unless otherwise notified by S•CAB.

### 6. PAYMENT OF THE PRICE

The payment of the price shall be done at the offices of S•CAB. Pursuant to articles 1523 and following of the Italian Civil Code, the Purchaser will only become the owner of the goods purchased once the full price for the same has been paid. In the event that payment of the price, in whole or in part, is not received, or is late, or if any payment cannot be collected, the Purchaser shall forfeit the benefit of the term, pursuant to article 1186 of the Italian Civil Code, including with reference to any other orders/purchasers made by the same Purchaser, and S•CAB may decide whether to demand full payment of the outstanding price, plus default interest pursuant to article 5 of Italian Legislative Decree no. 231/2002, or whether to make use of the retention of title clause and demand the return of the goods; in this latter case, any portion of the price already paid shall be kept by S•CAB by way of compensation. The Purchaser may not raise any objections in order to avoid or delay the payment of the price. S•CAB has the right to suspend deliveries of goods in the case of the Purchaser's non-fulfilment, even if partial, without this entitling the Purchaser to make a claim for damages.

### 7. TRANSPORTATION AND DELIVERY

The goods are sold EX WORKS and travel at the risk and hazard of the Purchaser, even in the event that transportation is carried out CARRIAGE PAID. The delivery terms are purely indicative.

The Purchaser is always responsible for the assembly of the products

and must follow the instructions supplied by S•CAB carefully. In the absence of instructions, the burden is on the Purchaser to request them from S•CAB. In the event that deliveries are delayed, the Purchaser is not entitled to seek penalties or charges from S•CAB nor is the Purchaser entitled to cancel the order, in whole or in part. S•CAB is, in any case, exonerated from every liability in the case that it is impossible to carry out the supplies within the times envisaged, or in the case of delays to delivery times due to unforeseeable circumstances or force majeure.

### 8. COMPLAINTS AND RETURNS - WARRANTY

The goods must be checked by the Purchaser at the moment they are received and/or before collection. Any complaints regarding the condition of the packaging, the quantity, the number or the exterior characteristics of the product, or regarding any visible defects, must be communicated by the Purchaser before collection or at the moment the goods sent by S•CAB are received, with the burden on the Purchaser to add a written reservation to the transport document and to report the event to S•CAB within 8 days from receiving the goods; a copy of the transport document with the reservation, the order number, clear photographs and a complete description of the alleged defects must accompany this report. No report will be examined without the documentation indicated. In the absence of a reservation note or failing to notify S•CAB within the terms indicated, S•CAB shall not be bound by the warranty for faults and defects in the goods sold which can be identified through a diligent check. The Purchaser is, in any case, required to check the integrity of the items before transferring them to a third party. Following a transfer, S•CAB will not accept any claims for damage attributable to transport. Any claims regarding defects which cannot be identified through a diligent check at the moment goods are collected/received must be reported to S•CAB by registered letter with return receipt within 8 days from their discovery and, in any case, no later than 24 months from the delivery date; the order number, clear photographs and a complete description of the alleged defects must accompany this report. If the information requested and needed to open an investigation is incomplete, S•CAB will not be bound by the warranty for faults and defects in the goods sold. S•CAB may, at its sole indisputable discretion, ask the Purchaser to send the disputed product to its corporate headquarters in order to check it and ascertain whether there are any grounds to the complaint. Sending the product for examination to the S•CAB offices shall be at the Purchaser's expense; should the disputed product not be sent within 5 days from the request being made, the Purchaser shall forfeit the right to the warranty. Returns of goods are not permitted, unless with the written consent of S•CAB. The warranty on manufacturing defects and faults is for 24 months, running from the date on which the goods are delivered/collected. In addition to the cases provided for above, the warranty does not apply:

- if the product was not assembled according to the supplied instructions;
- in the case in which the product is used improperly, or is used in a way which does not comply with the normal, intended use of the item;
- in the case in which the use and maintenance instructions, supplied with the product, are not followed;
- in the case in which the product is stored in unsuitable conditions;
- in the case in which the product has been altered or tampered with;
- if the product has been assembled or combined with components or products not supplied by S•CAB;
- if the fabrics used to cover S•CAB products have been supplied by the Purchaser;
- if the Purchaser is, in any way whatsoever, in default with regards to S•CAB, including for orders other than those for the product in question.

Costs for returning goods and for shipping products to replace defective ones shall be borne by the Purchaser. In the event that a defect is confirmed by S•CAB, the same reserves the right - at its sole discretion - to replace the item with an equal or equivalent one in terms of its essential characteristics, or to credit the Customer for the price of the item only. No additional expenses or damage may be claimed from S•CAB.

### 9. ONLINE SALES

In order to preserve the legitimate needs to safeguard the brand, the style and the image of prestige that accompanies its products, S•CAB may ask the Purchaser to perform online marketing in certain ways and to guarantee that (i) quality site graphics are used; (ii) an exclusive, virtual space dedicated to the S•CAB brand and products is arranged, without advertisements for, or references to, different products; (iii) a non-virtual shop is provided for. Photographs, product names, logos, trademarks and brands are the property of S•CAB and can only be published following the express authorisation by S•CAB. This authorisation can be revoked at any time.

### 10. DISPUTES

For any dispute regarding the interpretation or execution of the sale and the relationships between S•CAB and the Purchaser, reference shall be made exclusively to Italian law and the Court of Brescia, Italy, shall have exclusive jurisdiction, even when payment is agreed by means of bills or promissory notes with domiciliation at the Purchaser's offices. No one is authorised to represent S•CAB in court without a specific mandate.

**IMPORTANT:** S•CAB products are protected by patents which protect their uniqueness and the originality of the technologies, shapes, models, patterns and designs. Every S•CAB product is made in Italy in one of 3 S•CAB locations and each product is subject to rigorous manufacturing and quality controls.

## GUIDELINES FOR CREATING THE PRODUCT REFERENCE NUMBER

Please specify all component reference numbers of the product as per following order:

1. Model reference number
2. Frame finishing
3. Fabric monogram (letters) or main body colour (according to the selected model)
4. Fabric reference number

The number of pieces in the parcel is shown in the price list next to each model. Any order made for different quantities will be automatically modified adapting the quantity to the immediately following multiple.

## PRODUCT CERTIFIED BY THE CATAS BODY

The indication "CATAS Compliant with ..." means that the product has successfully passed all tests envisaged by current European regulations (EN 16139:2013 – latest edition – and EN 15373:2007) for structural requirements and seat resistance both for domestic and non-domestic use (so-called community) by adult persons.

These tests are carried out by CATAS laboratories (internationally accredited laboratory for certification, research and tests for the furnishing and furniture sector).

## FSC® certified article

The product is manufactured with wood supplied with origin certification from well- and responsibly managed forests.

REMADE is the accredited certification of the verification of recycled content and by-products in a material or product. REMADE is a traceability scheme, compliant with the Procurement Code and the CAM (Minimum Environmental Criteria).

S•CAB, a producer of furniture and accessories since 1957, has been listed in the Special Register of Historic Trademarks of National Interest.

The qualities of responsibility and environmental sustainability in industrial production are a green hope for the future of all of us. Contributing to the process of recycling materials and a production method that respects the environment and keeps it clean is also possible in the production and moulding of technopolymers.

All the S•CAB production is made with 100% recyclable materials as their individual components can quickly be sorted for disposal. Every plastic element has the identification mark according to ISO11469:2001, and provides easy directions for recycling.

All materials used by S•CAB for its production are of first quality.

**PLASTICS** – S•CAB uses techno-polymers with ideal characteristics to manufacture its products, polymeric materials that ensure sturdiness, stability, non-toxicity, resistance to atmospheric agents including mould, dust and smog, and resistance to UV rays. All our techno-polymers are 100% recyclable in full respect for the environment. **For cleaning** use neutral liquid soap diluted in water. Clean with a soft damp cloth to avoid scratches, by all means refrain from using abrasive sponges. Do not use abrasive or chlorine-based products, or solvents in general such as alcohol, benzene, acetone, trichloroethylene, ammonia etc., because these substances tarnish plastic surfaces.

**METALS | STEEL** – Only the highest quality steels are used and a strict control on mechanical resistance values is applied throughout the whole manufacturing process.

**METALS | ALUMINIUM** – Aluminium is a metal that combines lightness and great strength, and its surface is anodised or polyester powder coated to ensure superior resistance to corrosion. **For cleaning.** Use only a soft damp cloth to clean steel, aluminium or coated metal surfaces. Do not use abrasive creams or pastes to clean metals and do not use solvents. We recommend that by all means you refrain from using abrasive sponges or steel wool to clean the surfaces.

**WOOD** – S•CAB furniture items with wooden shell and/or Frame are manufactured in compliance with European standards, with full respect for the environment. **For cleaning** use only a soft suiting damp cloth and warm water and dry immediately with a soft, dry suiting.

Do not use abrasive or aggressive products, chlorine based products and solvents in general. (ammonia, bleach or cleaning products containing acid). Immediately mop up any spilt liquids with a clean dry cloth, wood does not stand the humidity.

Do not expose to direct sunlight. Do not expose to sources of heat.

Wood is a natural material and shall be subject to change color when exposed to sunlight. Wood is a natural raw material; this means that you cannot guarantee the homogeneity and uniformity of synthetic materials. Even elements made from the same plant may show colour differences. Colour variations or imperfections, due to the fibres or veins of wood, are a guarantee of the quality of solid wood and constitute its uniqueness. The colours of our woods are water-based, to respect the environment and health.

**FABRICS** – **For instructions** on how to clean fabrics, please refer to the specific data sheet. For everyday cleaning do not brush, but vacuum clean regularly, avoiding applying pressure to the fabric. For light stains, use a soft damp brush, using if necessary mild detergents or white vinegar diluted in a lot of water. **Do not use abrasive products or detergents or solvents. Do not use high pressure steam washers.**

**SIMIL-LEATHER** – **For cleaning.** For everyday cleaning, use a soft, damp cloth. For more stubborn dirt, use a soft sponge with water and soap. Do not use abrasive products or detergents or solvents for cleaning. Immediately mop up any spilt liquids with a clean dry cloth.

Some dyes for clothing and accessories (e.g., jeans) may migrate to the light colours of this item.

This phenomenon increases with humidity and temperature. We take no responsibility for colour transfer caused by external contaminants.

**LEATHER** – S•CAB uses only natural vegetable tanned leather for its upholstered seats. For everyday cleaning, use a soft dry cloth. For more stubborn dirt, use a soft damp cloth. Do not use abrasive products or detergents or solvents for cleaning.

**OUTDOOR CUSHIONS, MAINTENANCE AND CLEANING** – We recommend always following the instructions on the technical data sheets of the individual fabric and on any labels attached. We suggest regularly cleaning the fabrics to maintain their appearance and prolong their life. We recommend gentle daily cleaning with a vacuum cleaner to remove dust. Dry liquids as soon as possible with a white absorbent cloth. For light stains it is important to act quickly using a soft damp brush or a white cloth, using delicate detergents if needed. Before use, always evaluate the effectiveness of detergents on small, hidden parts. Do not use abrasive products, concentrates, solvents, or bleaches. The above advice does not guarantee complete removal of stains. The acrylic fabric cushions are suitable for outdoor use. During use, we still recommend protecting the cushions from bad weather with the appropriate protective sheets and avoiding prolonged exposure to the elements.

**CORK** – Cork is a 100% eco-friendly, natural, and recycled material; it is soft, elastic, insulating, with fire retardant properties, and can be used both outside (using the same precautions and the same maintenance as wooden products) and inside. The material is a wooden essence and lightens in the sun, as its natural feature. **For cleaning**, use a damp, non-abrasive cloth. Do not use aggressive products because the material absorbs and it could damage it.

**TOPS IN COMPACT HPL LAMINATE** – Compact HPL laminates are panels made up of several layers of cellulose fibre material, impregnated with thermosetting resins. They have excellent mechanical, physical, hygiene, and resistance qualities.

**For cleaning**, use a neutral liquid soap diluted in water. Clean with a soft, damp cloth to avoid scratches. Always finish by rinsing with lukewarm water and dry with a soft, clean cloth to avoid lime deposits. Do not leave the tops wet for long and dry any spilled liquids. Do not use abrasive or aggressive products, or abrasive sponges or brushes.

For more information on Fenix tops:

**LAMINATED WOOD TOPS MAINTENANCE AND CLEANING** – For cleaning use a liquid neutral soap diluted in water. Clean with a soft damp cloth to prevent scratches. Do not use abrasive or aggressive products (ammonia, bleach or cleaning products containing acid).

**DRY THE TABLE TOP AFTER CLEANING OR IN CASE OF DROPPING LIQUIDS. THE LAMINATED WOOD TOP DOES NOT STAND THE HUMIDITY.**
